COMPANY PROFILE

A SMART WAY TO MANAGE YOUR POWERED ASSETS

Vehicle tracking is an important aspect of any business, which is why you deserve a company that is best suited to your needs. We offer you service that is attuned to your business and we make sure that we do not only become your service provider, but your partner in tracking the vehicles in your fleet. We uphold our values to a high extent so that we always push through the extra mile to give you 100% customer satisfaction. No fleet is too large or too small for us; we can do it all!

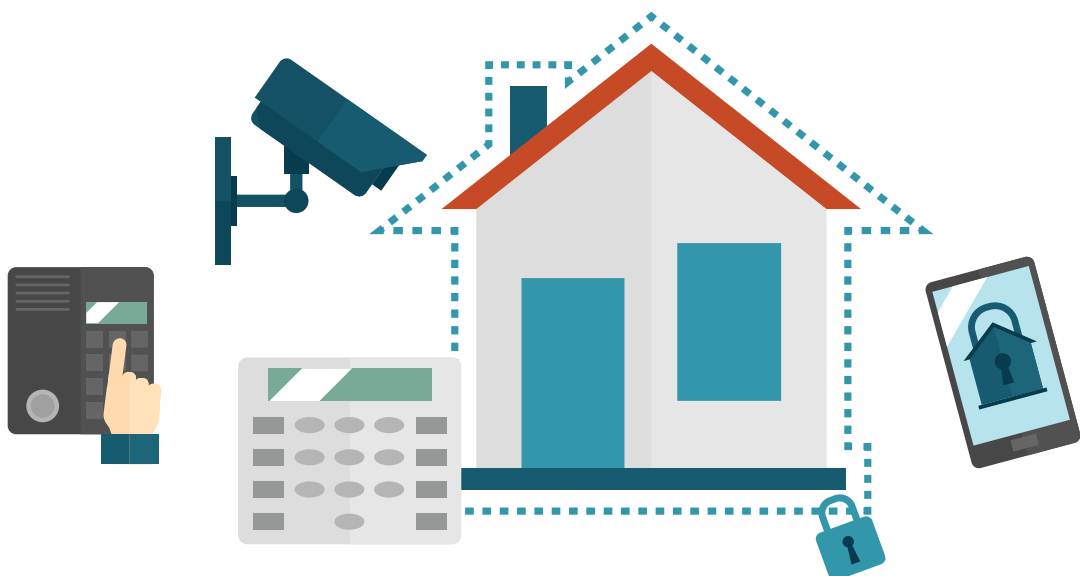

KEDALE
Assured Service

Background

Kedale Technologies is a limited liability company registered and incorporated in Kenya.

Kedale Technologies serves the technology market with specialization in Vehicle Tracking/Fleet Management, Biometric & Access Control Systems, CCTV Surveillance, Alarm Systems (Commercial & Residential), Computer & Accessories.

our mission

Kedale Technologies recognizes individual and business obligations to digitize business processes and data management and for these reasons we do leverage on our technologies to give our clients the freedom to focus on their core businesses.

Our vision

To be a market leader in offering reliable, cost effective technological solutions.

Our Core Values

Customer Focus
Continuous Improvement
Integrity
Innovation

Goals & Objectives

Business Profitability.
Effective Customer Service.
Operational Efficiency.

our strength

Our innovative hardware features, driver behavior and advanced anti-tamper technology as standard, offering our customer the widest range of benefits in the marketplace. We offer highly configurable, modular and scalable solutions with many additional hardware options that address a variety of challenges and meet precise business and operational requirements. This enables better-informed strategic decision making, using highly flexible reporting that is simple and easy to use, to achieve fleet efficiencies and reduce costs. Our automated scheduled email reports include journey, timesheet, mileage, exception, driver behavior, fuel and utilization to ensure the right data is delivered to the stakeholder in the most effective format at the right time.
